Summary

Passionate Software Engineer with a strong background in fullstack software development. Skilled in Embedded engineering and game development. Excellent problem-solving and collaboration abilities. Seeking a challenging role to develop real problems solutions that scale.

Experience

Junior Software Engineer

Jul 2024 – Jul 2026

Reispsolutions S.R.L.

Santo Domingo, Dom. Rep.

- Architected and developed end-to-end business solutions in collaboration with senior engineers
- Engineered cross-platform integrations, streamlining e-commerce data flow and inventory management
- Conducted peer code reviews and assisting in task delegation to optimize workflow efficiency
- Demonstrated code agnostic problem-solving by identifying and resolving critical bugs across legacy and modern tech stacks

Manufacturing & Telemetry Assistant

Aug 2024 – Apr 2025

Instituto Tecnológico de Santo Domingo's NASA HERC College Team

Santo Domingo, Dom. Rep.

- Partnered with an engineering team to design, build, and code a remote-controlled rover built to navigate simulated Mars and Moon terrains and complete complex mission tasks
- Led the full-stack architecture, designing and developing both the frontend and backend of the official Apolo 27 website
- Managed the end-to-end development of proprietary games and digital tools designed to promote STEM outreach across the Dominican Republic

Projects

Velo: Movie Matchmaker

Sep 2025 – Present

Shipped Mobile App

React Native, Supabase

- Developed a multi-platform production ready mobile app that solves a real problem: Movie night indecision.
- Implemented SOLID principles & Clean architecture for scalability.

Printune

May 2025 – Aug 2025

Tool to generate Spotify keychain 3d models

Python, React, Typescript

- Built a desktop app for windows and linux to generate a 3d model of a spotify code keychain ready to slice and print. Reusing open source fragment of code.
- Implemented the software on an online webapp for public access. Added google ads.

Education

Western Michigan University

Kalamazoo, MI

B.S. in Computer Engineering

Sep 2025 – Dec 2027

- 1st place winner of the computer club annual 24hr hackaton 2026
- 1st place winner of the computer club annual game jam 2025

Instituto Tecnológico de Santo Domingo

Santo Domingo, Dom. Rep.

B.E. in Computer Science (transferred). GPA: 3.89

Nov 2022 – Jul 2025

- Founder of the Game Development Club

Technical Skills

Programming Languages: C, C++, SQL, Javascript & Typescript

Frameworks: React & React Native, .NET, ESP-IDF

Libraries & Tools: Git, Docker, KiCad, OrCADx, SolidWorks, Fusion360

Certifications

- CS50x: CS50's Introduction to Computer Science
- SOLID Principles & Clean Code
- Dean's List all semesters
